**PRODUCT INFORMATION:** Ag Plus Pro Start is proprietary blend of sugars, fulvic acid, and EDTA zinc. Ag Plus Pro Start helps plants to better realize their full genetic potential. The sugars and fulvic acid are different carbon sources which free up minerals and improve the natural bacterial activity in the soil while the zinc corrects and prevents deficiencies. This combination of products has shown significant benefits when used with low-salt starters and foliar to enhance the efficiency and promote the uptake of nutrients.

**DIRECTIONS FOR USE:** Use in accordance with recommendations of a qualified individual/institution. Do not mix with calcium based fertilizers.

**Soil Application:** Apply in-furrow, 2x2, or at sidedress or topdress. Do not apply directly on the seed in saline, alkali, or coarse textured soils.

**Foliar Application:** Fill spray tank with water prior to adding fertilizer or other products. Use only as a supplement to a regular nutrient management program. Repeat applications may be beneficial. Use only as directed to avoid foliar burn. Do not apply when crop is excessively stressed for moisture or during periods of high temperatures. Use of a surfactant may enhance leaf coverage and increase nutrient absorption.

**RECOMMENDED RATES:** This product should be used on the basis of a soil and/or tissue analysis. Suggested application rates are for one growing season (per acre) in the absence of soil and/or tissue analysis.
